

Letter of Interest

Texas Power Pool

The Texas Power Pool is an aggregated wholesale electricity purchase organized through the [State Energy Conservation Office \(SECO\)](#) utilizing Texas SmartBuy Contract [961-M2](#) awarded by the [Texas Comptroller of Public Accounts](#) Statewide Procurement Division to Texas Energy Aggregation. [Texas Energy Aggregation](#) is releasing an RFP on behalf of interested public entities to accurately quantify opportunities currently available through aggregation.

Goals

This opportunity is available exclusively for Texas public entities to achieve the following goals:

- Longer-term budget certainty to reduce risk and exposure to volatile energy markets
- Lowest historical fixed electricity price under 3 cents per kWh utilizing:
 - statewide aggregated purchasing power
 - best practice, transparent, competitive bidding process
 - renewable power purchase agreements
- Utilization of State and University-owned land leases to create extra value for State and educational institutions
- Acting upon market-driven opportunities available before Federal renewable energy tax credits begin ramping down by Jan. 1, 2020

This Letter of Interest is non-legally binding and interested participants are under no obligation to accept any offer presented or to participate in an aggregation or individually. Signing this letter will in no way impact any existing electricity agreements which your institution may already have in place.

I am interested in participating in an aggregated electricity purchase, and would like to explore options, offers and pricing opportunities available through the State contract and Texas Power Pool described above. I may also be interested in savings/income potential from on-site solar Demand Response.
